TECHNICAL SKILLS

Frontend: Next.js, React, TypeScript, JavaScript, Tailwind CSS, HTML/CSS

Backend: NestJS, Node.js, Prisma ORM, REST API Design & Development

Database & Storage: Supabase (PostgreSQL), Supabase Auth, Supabase Storage

Architecture: Multi-Tenant Systems, Subdomain Routing, CRUD Systems, Progressive Web Apps (PWA, Service Workers)

DevOps & Deployment: Vercel, Render, Git, GitHub, CORS & Security Middleware

IT Fundamentals: Computer Assembly & Maintenance, Hardware/Software Troubleshooting, Peripheral & Driver Configuration

Tools & Workflow: Microsoft Office Suite, AI-assisted development for rapid prototyping and debugging

Languages: Filipino (native), English (professional working proficiency)

EXPERIENCE

Full-Stack Developer, Internship (OJT) — Promotional Website Platform

Mar – May 2026

Live tenant sites: starblue.vercel.app · stjosephapdc.vercel.app

- Architected a multi-tenant promotional web platform on NestJS and Prisma ORM with a Next.js frontend, deployed across Vercel and Render with CORS, request validation, and security middleware configured for production.
- Engineered a tenant management system with full CRUD operations, subdomain proxy routing, a tenant directory landing page, and dynamic per-tenant pages assembled from modular UI components (Hero, Lead Form, Project Gallery).
- Delivered an admin dashboard for tenant branding and content control, with image uploads through Supabase Storage, enforced section display ordering, and configurable Hero sections, allowing non-technical staff to update site content without developer involvement.

Full-Stack Developer, Internship (OJT) — Inventory Management System

Mar – May 2026

- Built and shipped a live inventory management application using Next.js, TypeScript, Tailwind CSS, and Supabase, including user authentication (login, registration, password reset), a dashboard with sidebar navigation, and a full inventory table with add, edit, and delete modals.
- Implemented multi-organization support with organization switching, invitation management, onboarding flows, and context-aware UI, serving multiple isolated tenants within the constraints of Supabase's free tier.
- Developed core platform components including a PWA installation prompt, activity reporting, and inventory and activity data providers; built account settings with profile management and avatar upload.

Data Encoder — Social Weather Stations (Contractual)

Mar 2021 – Mar 2022

- Encoded and validated survey response data into internal systems, maintaining accuracy across high-volume datasets under recurring deadlines.
- Performed quality checks on encoded records to identify and correct inconsistencies before dataset release.

IT Support, Internship — St. Joseph Amity Prime Development Corp.

Mar – May 2026

- Provided hardware and software troubleshooting support for office workstations and peripherals.
- Assisted with computer assembly, system driver configuration, and routine maintenance to keep staff equipment operational.

EDUCATION

STI College Cubao — Bachelor of Science in Information Technology

2022 – 2026

P. Tuazon Blvd. cor. 5th Avenue, Cubao, Quezon City

Asian Institute of Computer Studies — Senior High School

2019 – 2021

Information & Communications Technology (ICT) Strand — Rodriguez, Rizal
